Customer Letter

Dear Customer

Environmental Compliance

MPD takes environmental compliance very seriously, and continuously monitors regulatory and best practice developments to ensure its products conform with the latest environmental standards. The information below outlines the key elements of MPD's environmental strategy and compliance position.

Awareness and Strategy

MPD is aware of the major national and international regulations that apply to its products, including:

- **RoHS3** (European Union Directive on the Restriction of Hazardous Substances in Electrical and Electronic Equipment)
- **REACH** (European Union Regulation concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals)
- **China RoHS** (Order on Management Methods for the Control of Pollution by Electronic Information Products)
- **WEEE** (European Union Directive on Waste Electrical and Electronic Equipment)

In order to ensure compliance with these regulations, and to ensure that new developments do not disrupt the supply of materials used in MPD products or the supply of MPD products to our customers, we implement specific strategies, in cooperation with our suppliers, to deal with the current and evolving regulatory requirements.

RoHS 3 COMPLIANCE DECLARATION

RoHS 3 (EU) / RoHS (China)

The EU RoHS 3 and China RoHS rules are designed to restrict the use of certain hazardous materials in the manufacture of various types of electronic and electrical equipment. The China RoHS rules currently apply to the marketing and labelling of products and packaging materials only. MPD is fully aware of these rules and monitors the latest developments in legislation and official implementation guidance.

Memory Protection Devices, certifies the product families listed on page #1 as lead-free, and are in compliance with European Union Directive (RoHS Directive), 2011/65/EU (RoHS 2 Directive), and 2015/863/EU (RoHS 3 Directive) of the European Parliament with respect to the following substances:

EU RoHS compliant is defined as meeting the following requirements.

REACH (EU)

REACH is designed to ensure that certain chemical substances (“Substances of Very High Concern”, or SVHCs) have been properly evaluated, registered and the method of safe use effectively communicated to the end-user with the overall purposes of protecting human health and the environment. As a “downstream” user of components that might contain SVHCs, we are not subject to the REACH evaluation or registration requirements, although the communication requirements are potentially applicable.

We maintain full contact with our suppliers who might supply to us components or articles containing SVHCs. Based on information given to us by or suppliers, all of our products are below the threshold of 0.1% by weight for SVHCs. Should our goods or packages contain SVHC materials above this threshold, we will inform customers in line with the regulations.

WEEE (EU)

WEEE requires observation of various marking, collection, recycling and recovery targets for producers of certain categories of “electrical and electronic equipment” (“EEE”). A revised version of the WEEE Directive became effective in February 2014. As a supplier of interconnect products, MPD does not directly produce “EEE” as defined in the WEEE Directive. As a result, the requirements of the WEEE Directive do not directly apply to MPD products. The position under the revised WEEE Directive is not expected to change.
