Press Release

November 2, 2017

New top loading CR2032 lithium battery retainer, P/N: BC-2600.

MPD newest edition to the retainer family is P/N BC-2600 for 20 mm diameter batteries with vertical replacement feature. The battery is changed from the top unlike normal retainers that are side loading.

Offering a lighter weight than competing designs at well under 0.5 grams is just the beginning of its benefits. The great connectivity of P/N BC-2600 make it particularly suitable for applications where a reliable connection is paramount.

The Lithium battery retainer has three SMD leads for assurance it is mounted for the long term. Made of nickel-plated phosphor bronze and offering three large pressure contacts that are optimized to keep a tight connection with the cell. Shock and vibration resistant per EIA-364 assurers designers of trouble free use in hand held applications.

- CR2032 Lithium coin cells typically offer 220 to 240 mAh.
-
- Particularly suitable for automobile keyfob's.
- Hand held medical devices like thermometers and glucose meters.

Priced at $0.36 each when ordered in lots of 1,000 pieces and volume discounts are available. Delivery is normally from distributor stock or after a short waiting period.
