Press Release

August 29, 2016

New side loading CR2032 battery retainer, P/N: BK-915.

MPD newest edition to the retainer family is P/N BK-915 for 20 mm diameter batteries. Offering a lighter weight than competing designs with weighing in at just 0.6 grams is just the beginning of its benefits. The great connectivity of P/N: BK-915 make it particularly suitable for applications where a reliable connection is paramount.

The Lithium battery retainer has one SMD lead and two pc or locating pins. Made of nickel-plated phosphor bronze and offering a large pressure contact that is optimized to keep a tight connection with the battery. Shock and vibration resistant per EIA-364 assurers designers of trouble free use in typical applications. The battery is easily changed due to the intuitive design.

- Lithium coin cells include the ever popular CR2032 and BR2032 batteries.
- Rechargeable types included ML2032, VL2032 and LIR2032 batteries.
- Particularly suitable for automobile keyfob's.
- Hand held remotes like those for A/C, dehumidifiers and air purifiers.

Delivery is normally from distributor stock or after a short waiting period.
